This is a list of current virtual communities with more than 100 million active users. As of 2016, 46% of the world's human population (or 3.4 billion) and 4.15 billion have, at the end of December 2017, used the services of the Internet within the past year—over 100 times more people than in 1995 (see Global Internet usage).

List of virtual communities with more than 100 million

Active cables are copper cables for data transmission that use a silicon chip (semiconductor) to boost the performance of the cable. Without a chip, a cable is considered a 'passive' cable. Passive cables are liable to degrade the data they carry, due to such "channel impairments" as attenuation, crosstalk and group velocity distortion. In active cables, one or several semiconductor chips are ...
