

### **adolescent girls urban society pdf**

Adolescence (from Latin *adolescere*, meaning 'to grow up') is a transitional stage of physical and psychological development that generally occurs during the period from puberty to legal adulthood (age of majority). Adolescence is usually associated with the teenage years, but its physical, psychological or cultural expressions may begin earlier and end later.

### **Adolescence - Wikipedia**

Adolescent constitute about 20% of the total population, during this period they experiment for their adult identity and transition from dependence to independence. This leads to development of feeling of awkwardness and development of malnutrition among them. The malnutrition during this period affects their later life i.e., adulthood and old age.

Adolescent sexuality is a stage of human development in which adolescents experience and explore sexual feelings. Interest in sexuality intensifies during the onset of puberty, and sexuality is often a vital aspect of teenagers' lives. In humans, sexual interest may be expressed in a number of ways, such as flirting, kissing, masturbation, or having sex with a partner.

There are multiple consequences of violence, having immediate and short-term to inter-generational effects. The consequences and costs of violence have impacts at the individual level (for survivors, perpetrators and others affected by violence), as well as within the family, community and wider society, which translate into costs at the national level.

The epidemic of childhood obesity is rising globally. Although the risk factors for obesity are multifactorial, many are related to lifestyle and may be amenable to intervention. These factors include sedentary time and non-exercise activity thermogenesis, as well as the frequency, intensity, amounts and types of physical activity. Front-line health care practitioners are ideally suited to ...
