

aids in the world pdf

World AIDS Day, designated on 1 December every year since 1988, is an international day dedicated to raising awareness of the AIDS pandemic caused by the spread of HIV infection and mourning those who have died of the disease. Government and health officials, non-governmental organizations, and individuals around the world observe the day, often with education on AIDS prevention and control.

World AIDS Day - Wikipedia

Human immunodeficiency virus infection and acquired immune deficiency syndrome (HIV/AIDS) is a spectrum of conditions caused by infection with the human immunodeficiency virus (HIV). Following initial infection, a person may not notice any symptoms or may experience a brief period of influenza-like illness. Typically, this is followed by a prolonged period with no symptoms.

Brazil highlights treatment for all people with HIV 30 November 2018 – Ahead of World AIDS Day 2018, the Government of Brazil has announced the largest drop in AIDS-related deaths in the country, as a result of Brazil's policy for greater access to HIV prevention, testing, treatment and care.

WHO | HIV

At the World Bank, an internal study found what South African economist Alan Whiteside ridiculed as a silver lining in the plague.. If the only effect of the AIDS epidemic were to reduce the population growth rate, it would increase the growth rate of per capita income in any plausible economic model, said the June 1992 report by the bank's population and human resources department.
