Joint Commission Perspectives - Sound the Alarm: Managing

For effective alarm prioritisation: Define prioritisation rules and apply them consistently to each alarm in every system. Use about three priorities. Base priorities on the potential consequences if the operator fails to respond. Prioritise proportionately, eg 5% high priority, 15% medium, and 80% low.

Recommendations. At first glance, it may be easy to blame bedside caregivers for not responding to alarms. But alarm fatigue is systemic and needs to be addressed at the facility level, with a commitment from many disciplines, including biomedical engineering, physicians, and information technology.

Do you hear what I hear? Combating alarm fatigue

About MABAS-IL MABAS (Mutual Aid Box Alarm System) in partnership with IEMA (Illinois Emergency Management Agency) have established a statewide, non-discriminatory mutual aid response system for fire, EMS and specialized incident operational teams.

The Uses and Users of PHA/HAZOP Results (PDF; 1.3 MB) NEW-2018 Process Hazard Analyses (PHAs) performed using methods such as HAZOP and What-if that are augmented by checklists, have become well established as a core for understanding risk in a hazardous chemical process and other processes. Some see the PHA results as an end to them itself.
