Nursing Care of the Family during Pregnancy

The approval of medical treatments for idiopathic pulmonary fibrosis (IPF) marks a new era in approaching this deadly disease: offering hope to patients and their physicians, a clearer path forward for companies interested in the development of new treatments, and the potential for new biological insights.

Diagnostic criteria for idiopathic pulmonary fibrosis: a

Avian Influenza . infected if they are exposed. HPAI viruses are not normally found in wild birds, although a few subtypes have been detected, and some have caused outbreaks.

Avian Influenza Importance - Home: OIE

The study of dinosaurs began in the 1820s in England. Pioneers in the field, such as William Buckland, Gideon Mantell, and Richard Owen, interpreted the first, very fragmentary remains as belonging to large quadrupedal beasts. Their early work can be seen today in the Crystal Palace Dinosaurs, constructed in the 1850s, which present known dinosaurs as elephantine lizard-like reptiles.

In medicine, public health, and biology, transmission is the passing of a pathogen causing communicable disease from an infected host individual or group to a particular individual or group, regardless of whether the other individual was previously infected.. The term strictly refers to the transmission of microorganisms directly from one individual to another by one or more of the following ...

Cancer cells rewire their metabolism to promote growth, survival, proliferation, and long-term maintenance. The common feature of this altered metabolism is the increased glucose uptake and fermentation of glucose to lactate. This phenomenon is observed even in the presence of completely functioning mitochondria and, together, is known as the "Warburg Effect".

The Warburg Effect: How Does it Benefit Cancer Cells

Incineration of plastic waste in an open field is a major source of air pollution. Most of the times, the Municipal Solid Waste containing about 12% of plastics is burnt, releasing toxic gases like Dioxins, Furans, Mercury and Polychlorinated Biphenyls into the atmosphere.

Toxic Pollutants from Plastic Waste- A Review - ScienceDirect

Taste is a sensory modality involving the oral perception of food-derived chemicals that stimulate receptor cells within taste buds. Taste principally serves two functions: it enables the evaluation of foods for toxicity and nutrients while helping us decide what to ingest and it prepares the body to metabolize foods once they have been ingested.

An Evolutionary Perspective on Food and Human Taste

Decreasing the number of preventable rehospitalizations by 20% by the end of 2013 is a goal of the \$1 billion federal initiative Partnership for Patients, and the pursuit of this goal represents ...
