

### **experiences in personality research pdf**

Fantasy prone personality (FPP) is a disposition or personality trait in which a person experiences a lifelong extensive and deep involvement in fantasy. This disposition is an attempt, at least in part, to better describe "overactive imagination" or "living in a dream world". An individual with this trait (termed a fantasizer) may have difficulty differentiating between fantasy and reality ...

In psychology, schizotypy is a theoretical concept that posits a continuum of personality characteristics and experiences, ranging from normal dissociative, imaginative states to extreme states of mind related to psychosis, especially schizophrenia. The continuum of personality proposed in schizotypy is in contrast to a categorical view of psychosis, wherein psychosis is considered a particular ...

Computational detection and understanding of empathy is an important factor in advancing human-computer interaction. Yet to date, textbased empathy prediction has the following major limitations: It underestimates the psychological complexity of the phenomenon, adheres to a weak notion of ground truth where empathic states are ascribed by third parties, and lacks a shared corpus.
