Food irradiation is the process of exposing food and food packaging to ionizing radiation. Ionizing radiation, such as from gamma rays, x-rays or electron beams, is energy that can be transmitted without direct contact to the source of the energy capable of freeing electrons from their atomic bonds in the targeted food. The radiation can be emitted by a radioactive substance or generated ...

I spend a lot of time as a pharmacist discussing side effects and allergies to drugs. For your own safety, I won't recommend or dispense a drug until I know your allergy status. I don't limit the history to drugsâ€”I want to know anything you're allergic to, be it environmental, food, insects, or anything else. Allergies can create true therapeutic challenges: We can't dismiss any allergy ...
