A parasite is an organism that lives on or in a host and gets its food from or at the expense of its host. Parasites can cause disease in humans. Some parasitic diseases are easily treated and some are not. The burden of these diseases often rests on communities in the tropics and subtropics, but parasitic infections also affect people in developed countries.

Highlights. In 2012, CDC updated its recommendations on children's blood lead levels. By shifting our focus to primary prevention of lead exposure, we can reduce or eliminate dangerous lead sources in children's environments BEFORE they are exposed.; What has not changed is the recommendation for when to use medical treatment for children. Experts recommend chelation therapy when a child ...
