Interpreting is a translational activity in which one produces a first and final translation on the basis of a one-time exposure to an expression in a source language.. The most common two modes of interpreting are simultaneous interpreting, which is done at the time of the exposure to the source language, and consecutive interpreting, which is done at breaks to this exposure.

Despite India's 50% increase in GDP since 1991, more than one third of the world's malnourished children live in India. Among these, half of the children under three years old are underweight and a third of wealthiest children are over-nutriented.. One of the major causes for malnutrition in India is economic inequality. Due to the low social status of some population groups, their diet often ...
