The focus of proteomics is a biological group called the proteome. The proteome is dynamic, defined as the set of proteins expressed in a specific cell, given a particular set of conditions. Within a given human proteome, the number of proteins can be as large as 2 million. [1] Each level of protein ...

An intelligence quotient (IQ) is a total score derived from several standardized tests designed to assess human intelligence. The abbreviation "IQ" was coined by the psychologist William Stern for the German term Intelligenzquotient, his term for a scoring method for intelligence tests at University of Breslau he advocated in a 1912 book. Historically, IQ is a score obtained by dividing a ...

1. INTRODUCTION 1.1 A short introduction to Social Network Analysis. A network is made of two components : a list of the actors composing the network, and a list of the relations (the interactions between actors). As part of a mathematical object, actors will then be called vertices (nodes, in Gephi), and relations will be denoted as edges (edges, in Gephi).

GEPHI – Introduction to Network Analysis and Visualization

Toby Young. The Fall of the Meritocracy. The left loathes the concept of IQ -- especially the claim that it helps to determine socio-economic status, rather than vice versa-- because of a near-religious attachment to the idea that man is a piece of clay that can be moulded into any shape by society

Lamarckism (or Lamarckian inheritance) is the hypothesis that an organism can pass on characteristics that it has acquired through use or disuse during its lifetime to its offspring. It is also known as the inheritance of acquired characteristics or soft inheritance. It is inaccurately named after the French biologist Jean-Baptiste Lamarck (1744–1829), who incorporated the action of soft ...
