Calculating Cost Savings from FY08 Pollution Prevention Projects Purpose: To ensure a standard and credible method is used to compare the cost savings of all pollution prevention proposals, allowing apples to apples™ comparison of project savings.

Calculating Cost Savings from FY0 Pollution Prevention

Whereas, the Payback Period rule does not involve discounting cash flows, the NPV rule is based on discounting considerations. Therefore, the relevant cash flows for the Payback Period rule are different from the relevant cash flows for the NPV rule. The logic of this argument is illustrated through a numerical example.

Payback Period and NPV: Their Different Cash Flows

Under payback method, an investment project is accepted or rejected on the basis of payback period. Payback period means the period of time that a project requires to recover the money invested in it.

Payback method - formula, example, explanation, advantages

Payback Period Advantages Disadvantages 1. Simple to compute 2. Provides some information on the risk of the investment 3. Provides a crude measure of liquidity 1. No concrete decision criteria to indicate whether an investment increases the firm's value 2. Ignores cash flows beyond the payback period 3. Ignores the time value of money 4.

Advantage and disadvantages of the different capital
