

plantation silviculture in europe pdf

Silviculture is the practice of controlling the establishment, growth, composition, health, and quality of forests to meet diverse needs and values.. The name comes from the Latin silvi-(forest) + culture (as in growing). The study of forests and woods is termed silvology. Silviculture also focuses on making sure that the treatment(s) of forest stands are used to preserve and to better their ...

Silviculture - Wikipedia

A plantation is the large-scale estate meant for farming that specializes in cash crops. The crops that are grown include cotton, coffee, tea, cocoa, sugar cane, sisal, oil seeds, oil palms, rubber trees, and fruits. Protectionist policies and natural comparative advantage have sometimes contributed to determining where plantations were located.. A plantation house is the main house of a ...

Plantation - Wikipedia

1 Forest characteristics Background paper to the Kotka V Expert Consultation 1 Introduction The term "forest" encompasses a variety of different kinds of forests, both in terms of species

Forest characteristics FINAL - Food and Agriculture

This Special Issue of the International Journal of Biodiversity Science, Ecosystem Services & Management (IJBESM) examines possibilities for positive synergy between managing timber species (especially those of high value) and biodiversity. Management for the production of high-value timber species and to conserve biodiversity can conflict with each other.

Synergies between biodiversity and timber management

Geschichte. Das Wort Plantage (wörtlich das Einpflanzen von Stecklingen [plantes]) wurde im 17. Jahrhundert aus dem Französischen in das Niederländische und Deutsche entlehnt, ist aber heute ein falscher Freund. Dem Begriff Plantage als Großpflanzung entspricht im heutigen Französischen wie auch im Englischen plantation (wörtlich Anpflanzung von Stecklingen [plantes]).

Plantage " Wikipedia

Rapid development of industrial plantations: In 1995 the industrial plantation area was estimated to be 103 million ha and the non-industrial plantation area to be 20 million ha. Over 50% of the plantations are assessed to be less than 15 years and 25% are less than five years. 7,34 The establishment of new plantations is assumed to increase between 160 and 235 million ha in year 2050. 7 ...

Action Bioscience - promoting bioscience literacy

Summary of Invasiveness Top of page. *S. cumini* is a fast-growing tropical and sub-tropical tree preferring moist, riverine habitats, that is valued for its fruit, timber and as an ornamental and as such has been widely introduced from its native South Asia. The sweet fruit is readily consumed by a variety of animals which, along with water, spread seeds widely.
