Abortion is the ending of pregnancy due to removing an embryo or fetus before it can survive outside the uterus. An abortion that occurs spontaneously is also known as a miscarriage. When deliberate steps are taken to end a pregnancy, it is called an induced abortion, or less frequently an "induced miscarriage". The word abortion is often used to mean only induced abortions.

Note: Definitions of severity classes for acute asthma used in this handbook may differ from those used in published clinical trials and other guidelines that focus on, are or restricted to, the management of acute asthma within emergency departments or acute care facilities. In this handbook, the severity of flare-ups and acute asthma is defined consistently across all Australian clinical ...

12 May 2016: New estimates, published today in the Lancet, indicate that the induced abortion rate has declined significantly in more developed countries between 1990 and 2014, but not in developing countries. A new study, undertaken by the Guttmacher Institute and WHO, has estimated that, worldwide, during the period 2010-2014, there were 35 abortions per 1000 women aged 15-44.
