Water, Sanitation and Hygiene Standards for Schools in Low

Drinking water supply and sanitation in Pakistan is characterized by some achievements and many challenges. [citation needed] Despite high population growth the country has increased the share of the population with access to an improved water source from 85% in 1990 to 92% in 2010, although this does not necessarily mean that the water from these sources is safe to drink.

Water supply and sanitation in Pakistan - Wikipedia

The Ugandan water supply and sanitation sector made substantial progress in urban areas from the mid-1990s until at least 2006, with substantial increases in coverage as well as in operational and commercial performance.: pages 3-4 Sector reforms from 1998 to 2003 included the commercialization and modernization of the National Water and Sewerage Corporation (NWSC) operating in cities and ...

Water supply and sanitation in Uganda - Wikipedia

Water is essential to health and food production. Globally, nearly 2.1 billion people lack access to safe drinking water in their homes and about 4.4 billion lack access to proper sanitation, putting them at risk of disease. Coupled with poor hygiene, the lack of adequate water and sanitation is a leading cause of disease and death worldwide. Food production is the largest consumer of water, and ...
